PROFILE

Over 25 years in tech: Product Lead at PagoPA, the state-controlled company behind Italy's public digital payments and services platforms, after co-founding and leading six companies across Italy and the United States. Every chapter started with a leap — from student to entrepreneur, from consulting to software products, from Milan to San Francisco, from entrepreneur to intrapreneur. A computer scientist who still builds hands-on: AI agents, local-first computer vision, and research on artificial valence.

HOW I WORK

Zero to one

At my best when a product doesn't exist yet; my ground is 0→1 more than scale-up.

Quick, not dirty

Every step becomes solid ground for the next; prototype before building the real product.

Trust first, then autonomy

Especially with AI: privacy by design, autonomy only where it is reliable.

The best technology is the kind you don't see

A good product removes friction instead of adding interfaces.

Build to understand

Close to the code, ideas tested against real-world constraints.

Small teams, clear ownership

Two-pizza teams, cross-pollination, proactive people; no diffused responsibility.

EXPERIENCE

Product Lead · PagoPA S.p.A., Milan

2023 — now

- I lead three main initiatives, each with a dedicated team of 4–6 people, plus a few early-stage ones: 15–20 people in all, in cross-functional teams spanning tech, design, legal and account management.
- Launched the [Developer Portal](#), the first developer portal of the Italian Public Administration: a single place to integrate PagoPA's products, used by thousands of public bodies and technology partners (covered by Wired Italia, December 2023).
- Released [DOS68K](#), an open-source RAG platform spun off from the Developer Portal's AI assistant.

Senior Product Manager · PagoPA S.p.A., Milan

2021 — 2023

- Joined the Strategic Innovation department; worked on EU-funded innovation projects.
- Laid the groundwork for the Developer Portal, launched in 2023.

Senior Product Manager · HELLO Mobility, Milan

2020 — 2021

- Led the build and production launch of the HELLO app, a Quisque spin-off: one platform for structured parking, EV charging and micromobility.

Co-Founder · International STEM Awards, Milan

2019 — 2020

- An international platform where young people aged 7 to 25 put forward STEM projects on global challenges, judged by a scientific committee from Italian and European universities and research centres.
- The first edition, moved entirely online by the pandemic, gathered 118 projects from about 300 young people in 10 countries.

CEO & Co-Founder · Thingle.me, San Francisco

2015 — 2019

- A team of about 8 people.
- Customer support software built for physical products: a QR code or NFC tag on the object takes its owner straight to the manufacturer's support, no app download needed.
- In 2018 launched Thingly, a conversational AI assistant to manage appliances, warranties and maintenance.

Chief Technology Officer · Styloola, Milan

2014

- Led the development of the Styloola Box, a Wi-Fi device installed in stores to measure footfall and profile shoppers: the shift from a social fashion app to analytics for physical retail.

CEO & Co-Founder · Opinionage Inc., San Francisco

2011 – 2015

- A team of about 8 people.
- Launched opinionage.com, the social network of opinions (2011), then brought its technology to SMEs with HUBNGO, a platform to build online communities (2013).
- Featured in *Starting-Up in America* (2011), a documentary on international founders building companies in Silicon Valley.

Co-Founder & CTO · Couponline, Milan

2004 – 2009

- A team of about 8 people.
- With ScontoQui, delivered personalised coupons at the store entrance, requested with an optical code or a mobile phone call, before smartphones came along.

CEO & Co-Founder · Concept srl, Milan

2000 – 2011

- A team of up to 12–15 people.
- Turned consulting into software products: myK, an Enterprise Feedback Management platform listed by Gartner in 2010 among the leading solutions in the field.
- Contributor to the Italian edition of *Soluzioni open source per la PMI* (John Locke, Tecniche Nuove, 2005).

CEO & Co-Founder · Information Delivery Systems S.r.l., Milan

1997 – 2000

- A Business Intelligence consulting boutique, founded while still at university, that grew to 25–30 people.

EDUCATION

MSc, Information Sciences (Scienze dell'Informazione) — Università degli Studi di Milano

Product Management — Stanford Online, 2025–2026: *Transforming Opportunities into Great Products* · *Mastering Product Management: Building Your Strategy* · *User Research: Informing Product Decisions with Customer Insights*

Deep Learning Specialization — Coursera / deeplearning.ai, 2018: *Neural Networks and Deep Learning* · *Improving Deep Neural Networks* · *Structuring Machine Learning Projects* · *Convolutional Neural Networks* · *Sequence Models*

SIDE PROJECTS

Artificial valence — research on projection-grounded AI, falsifiable on a robot testbed

Lurch Home — open-source, privacy-first smart butler for agentic AI

Local-first vision — CLIP and ArcFace tools for on-device photo archives

LANGUAGES
